## 👤 About me:

I studied economics for 3 years, with excellent qualifications, but found out that I didn't liked that business, it was not for me at all.

I was always interested in technology, and since I was a young boy, I fixed many PCs, from my family friends, but I wanted to become a professional, so I decided to study programming.

I'm very curious, and I'm always learning new things and languages. And i have learned programming in a self-taught way, until I joined the r/a Bootcamp.

Currently, I'm in Mar del Plata city Argentina, but I'm open for relocation offers outside the city or plain abroad. Or remote.

*In peace, prosperity, and principles, things, grow...*
